This is the changing outfit obstacle. It will be made of simple cardboard with a pin connecting it (through the center) to the board. This will allow it to rotate about the pin (or axis).

This is a toilet paper roll. It is not glued to the board or fixed in any way - it just sits there.

This is the toilet paper roll mentioned above, it is located in the center of the W and 3\" from the top. The toilet paper roll at the other end of the W is also centered at the point of the W.

The track is one inch from the changing outfit obstacle.

The pin is located right in the center (a vertical pin).

This is also a toilet paper roll, but it will have a small weight on top of it (approx 55 grams or less).
